INTRODUCTION

This mini project is a GitHub Login Page Clone developed using HTML and CSS. The main objective of this project is to understand the fundamentals of web page design and user interface development. It replicates the appearance and layout of GitHub's login page, including input fields, buttons, links, and footer sections.

Through this project, concepts such as HTML structure, CSS styling, page layout, alignment, colors, spacing, and form design were implemented. This project helps in improving front-end web development skills and provides practical experience in creating responsive and visually appealing web pages.

INPUT CODE

```
<html>
<head>
<title>GITHUB LOGIN PAGE</title>
<style>
  body{
    background-color: rgb(23, 24, 33);
  }
  img{
    width: 50px;
    height: 50px;
    margin-left: 600px ;
    margin-top: 100px;
  }
  h2{
    color: white;
    text-align: center;
  }
  #l1{
    color: white;
    margin-left: 420px;
  }
  #i1{
    margin-left: 420px;
    width: 400px;
    height: 40px;
    border: 1px solid grey;
    background: transparent;
    border-radius: 8px;
  }
  #p1{
    margin-left: 700px;
    color: rgb(35, 112, 183);
    margin-bottom: 5px;
  }
  #l2{
    color: white;
    margin-left: 420px;
  }
  #i2{
    margin-left: 420px;
    width: 400px;
```

```

        height: 40px;
        border: 1px solid grey;
        background: transparent;
        border-radius: 8px;
    }
    #b1{
        margin-left: 420px;
        width: 400px;
        height: 40px;
        border: 1px solid black;
        border-radius: 8px;
        background-color: rgb(46, 145, 46);
        color: white;
        text-align: center;
    }
    #p2{
        text-align: center;
        margin-right: 5px;
        color: white;
    }
    #b2{
        margin-left: 420px;
        width: 400px;
        height: 40px;
        border: 1px solid white;
        border-radius: 8px;
        background-color: rgb(18, 17, 30);
        color: white;
    }
    #b3{
        margin-left: 420px;
        width: 400px;
        height: 40px;
        border: 1px solid white;
        border-radius: 8px;
        background-color: rgb(18, 17, 30);
        color: white;
    }
    #p3{
        text-align: center;
        color: white;
        margin-right: 10px;
    }
    #p4{
        text-align: center;
        color: rgb(35, 112, 183);
    }

```

```

    margin-top: 20px;
    margin-right: 10px;

}
#footer{
    color: white;
    text-align: center;
    background-color: rgb(18, 17, 30);
    height: 50px;
    width: 100%;
    display: flex;
    justify-content: center;
    margin-top: 30px;

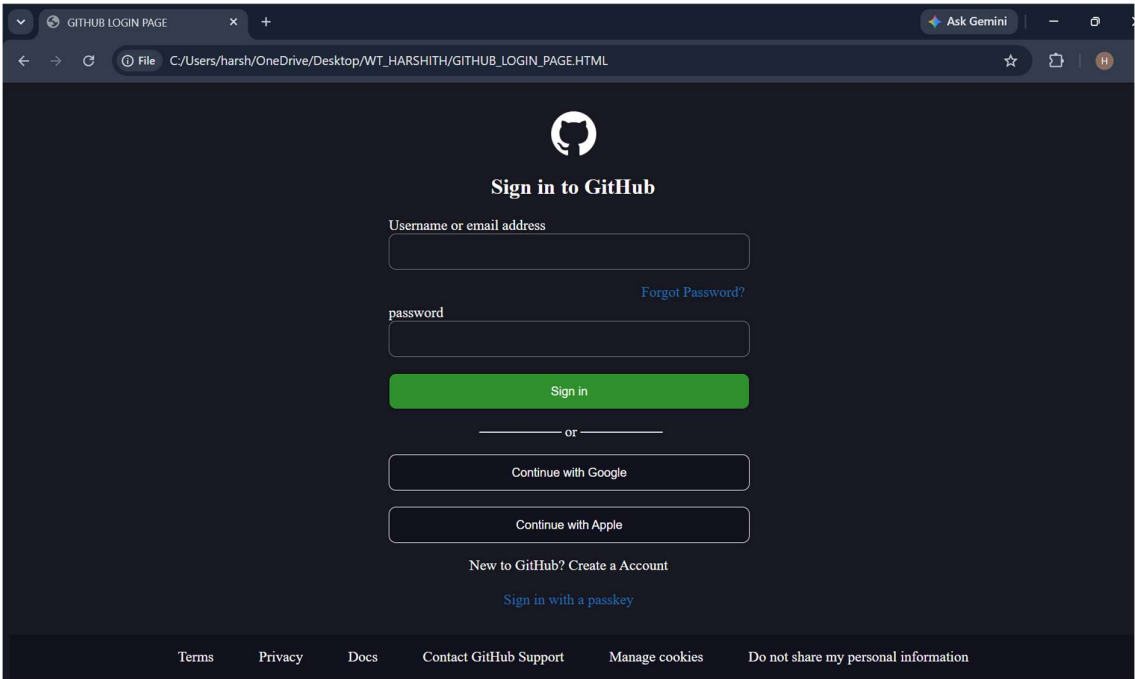

}
#footer span{
    margin-right: 80px;
    margin-top: 15px;
    margin-left: 20px;
    margin: 15px 25px;
}

</style>
</head>
<body>
    
    <h2>Sign in to GitHub</h2>

```

OUTPUT CODE

CONCLUSION

The GitHub Login Page Clone was successfully developed using HTML and CSS. This project helped in understanding the basics of web page structure, styling, alignment, forms, and layout design. By recreating a real-world login page, practical experience was gained in front-end development concepts. The project improved skills in creating visually appealing and user-friendly web interfaces and provided a strong foundation for developing more advanced web applications in the future.
