OUTPUT CODE

Employee Id Card

CONCLUSION

The Employee ID Card project was successfully developed using HTML and CSS. It provides a simple, professional, and visually appealing way to display employee details such as name, photo, designation, employee ID, email, phone number, and barcode. This project helped improve basic web development skills, including page layout, styling, alignment, colors, and responsive design techniques. It serves as a good beginner project for understanding the fundamentals of front-end web development.
