INTRODUCTION

This mini project creates a Chess Board using HTML and CSS. It uses an HTML table to build an 8×8 board with alternating black and white squares. CSS is used for styling, sizing, and centering the board. Unicode chess symbols are used to display the chess pieces in their correct starting positions. This project helps in learning basic HTML tables and CSS styling techniques.

OUTPUT CODE

CONCLUSION

This mini project successfully creates a Chess Board using HTML and CSS. It demonstrates the use of HTML tables, CSS styling, and Unicode chess symbols to design a visually appealing chess board. Through this project, basic web development concepts such as layout creation, styling, and element formatting are learned effectively.
